

# TCS Visual Control Center

TCS International's Visual Control Center is the graphical user interface and communication service for all of our parking guidance systems. The Visual Control Center communicates to all the devices installed and displays real time parking availability, counting device status, and sign information. This system will allow users to view, and export numerical and graphical parking information statistics providing important occupancy information.

## Software Highlights:

- Real time parking availability
- Easy to use graphical user interface
- Device status updates
- Parking information statistics
- Customized on screen parking guidance layout based on customer's facility
- Ability to export statistics
- Compatible with all TCS International's parking guidance products
- Web interface capability for displaying parking availability information on customer web sites

## Typical Applications:

- Single Space Monitoring
- Space Availability Per Level
- Facility Space Availability
- Surface Lot Space Availability
- City Wayfinding

## Features

A customized graphical user interface which displays all devices and real time parking availability information.

Parking availability statistics provide vital occupancy information, and could assist with staffing or marketing plans

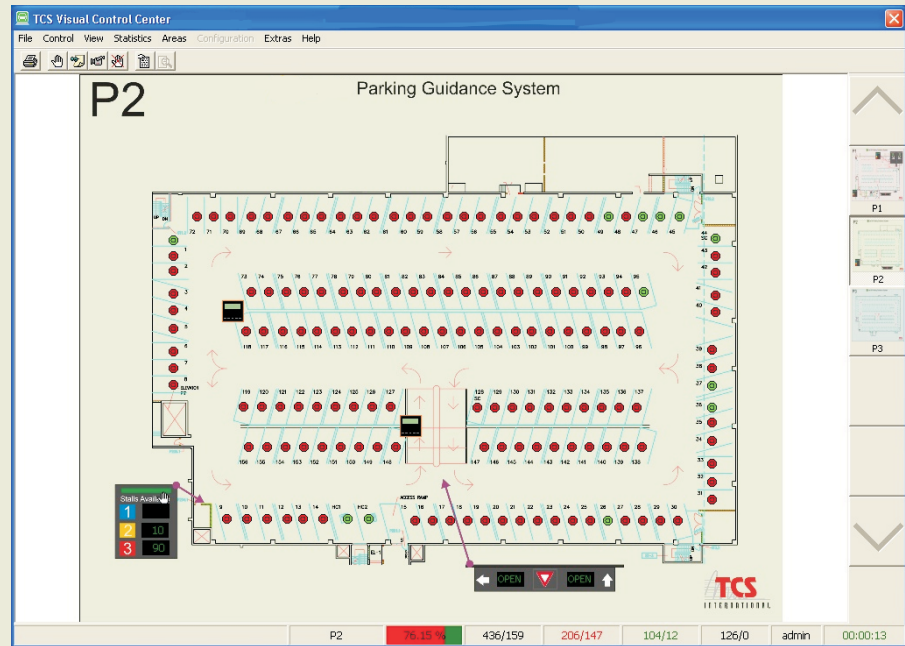

# DATASHEET

## TCS Visual Control Center is used with all of TCS Parking Guidance Products:

- Ultrasonic Single Space Sensors
- Ultrasonic Directional Sensors
- Surface Parking Space Sensors
- Roadway Sensors
- Space Availability Signs
- Variable Message Signs
- Wireless Mesh technology
- In ground loop technology

## TCS Visual Control Center

Example of TCS Visual Control Center graphical user interface displaying a parking level with ultrasonic single space monitoring technology. The user is able to view real time parking availability and occupancy on a per stall basis as well as parking availability signs.

### About TCS

TCS International manufactures and designs intelligent parking guidance solutions. Real time monitoring allows our customers to promote open spaces, and improve vehicle flow by reducing “cruising” which increases operator and customer satisfaction. Getting customers to their destination more quickly has the added benefit of reducing your facility's carbon footprint. TCS conceptualizes, manufactures, and continually improves all of its products by harnessing over 100 years of direct industry knowledge found in its product development team. From wireless intelligent parking guidance systems, to automated parking management solutions, TCS provides end-to-end solutions to monitor and facilitate car egress for any facility.
