Highway Signage

Make traffic control safer and more efficient with high-quality lane control signage, as well as regulatory and warning signs for bridges, tunnels, tollways, and weigh stations. Our unique ability to customize any LED sign for the transportation industry, coupled with our willingness to do whatever it takes to make sure your project is completed to perfection, is what makes us different from all other sign manufacturers.

Using narrow-angled LEDs and large multi-stroked characters to achieve a maximum viewing distance of more than 1,000 feet in all lighting conditions, including direct sunlight. Environmentally friendly, our low-power consuming signs are made to withstand extreme stress in high-vibratory conditions, such as toll plazas. Signs are made from corrosion resistant materials and can be housed in our water-tight enclosure, ideal for harsh weather and rugged conditions.

Signage Designed to Meet MUTCD Specifications

Signs Available in All Standard MUTCD Sizes

NO U-TURN Symbol
MUTCD R3-4
MUT2424RW-A872
8555

NO LEFT TURN Symbol
MUTCD R3-2
MUT2424RW-626
