

CASE STUDY

Legacy Place - Dedham, Massachusetts

The Legacy Place in Dedham, Massachusetts is a shopping mall project which includes retail, dining, movie theaters, and office space. Legacy Place required a parking guidance solution that could effectively and efficiently direct drivers to available parking. The system also included variable message signs which will display important messages to the shopping public.

Installation Highlights:

- 1200 space parking structure
- Ultrasonic directional sensors provide accurate counts
- External parking space availability signs
- Internal parking space availability signs
- Complete wireless architecture
- Programmable variable message signs used for promotional messaging as well as parking space availability

Wireless variable message signs used to display marketing information.

Garage entrance sign parking availability on each level for shoppers

CASE STUDY

Legacy Place takes advantage of TCS International's versatile parking guidance system software. The software provides a graphical user interface displaying real time parking availability, counting device status, and sign information. It also allows users to view and export numerical and graphical parking information statistics providing important occupancy information on critical shopping days.

Technologies

- Ultrasonic Directional Sensors
- Variable Message Signs
- Internal and external space availability signs
- Wireless mesh technology
- Level counting

Large variable message sign used for marketing or parking information.

Internal signs guide parkers to available parking.

About TCS

TCS International manufactures and designs intelligent parking guidance solutions. Real time monitoring allows our customers to promote open spaces, and improve vehicle flow by reducing "cruising" which increases operator and customer satisfaction. Getting customers to their destination more quickly has the added benefit of reducing your facility's carbon footprint. TCS conceptualizes, manufactures, and continually improves all of its products by harnessing over 100 years of direct industry knowledge found in its product development team. From wireless intelligent parking guidance systems, to automated parking management solutions, TCS provides end-to-end solutions to monitor and facilitate car egress for any facility.
