

## CASE STUDY

# Sunnyvale Town Center - Sunnyvale, California

The Town Center in Sunnyvale, California is a shopping center project which includes retail, dining, and office space. Town Center required a parking guidance solution that could effectively and efficiently direct drivers to available parking in the four level parking structure. This is accomplished with ultrasonic directional sensors at each entrance and exit, as well as between all levels. Available space signs guide drivers throughout the garage to ensure easy and stress free parking.

### Installation Highlights:

- Over 1000 space parking structure
- Ultrasonic directional sensors provide accurate counts
- External parking space availability signs
- Internal parking space availability signs
- Integration of LED signs into customer's custom made cabinets

TCS LED signs integrated into custom cabinets

Level signs provide guidance throughout facility

### About TCS

TCS International manufactures and designs intelligent parking guidance solutions. Real time monitoring allows our customers to promote open spaces, and improve vehicle flow by reducing "cruising" which increases operator and customer satisfaction. Getting customers to their destination more quickly has the added benefit of reducing your facility's carbon footprint. TCS conceptualizes, manufactures, and continually improves all of its products by harnessing over 100 years of direct industry knowledge found in its product development team. From wireless intelligent parking guidance systems, to automated parking management solutions, TCS provides end-to-end solutions to monitor and facilitate car egress for any facility.
