

CASE STUDY

Promenade - Temecula, California

The Promenade in Temecula, California is a shopping center which includes retail, dining, movie theaters, and office space. The Promenade required a parking guidance solution that could guide shoppers quickly and easily to available parking totaling 1500 spaces in two multi-level parking structures.

Installation Highlights:

- 1500 parking spaces between two parking garages
- Ultrasonic directional sensors provide accurate counts
- Roadway sign displays facility counts for each parking garage
- Level signs guide drivers to available parking spaces inside the garages
- Parking guidance software providing user interface and statistics
- Master signs display each level at the entrance of each structure

CASE STUDY

The Promenade uses TCS International's versatile parking guidance system software, which provides a graphical user interface displaying real time parking availability, counting device status, and sign information. This powerful software also allows the user to view and export numerical and graphical parking information statistics providing important occupancy information on critical shopping days.

Technologies

- Ultrasonic Directional Sensors
- Roadway Guidance Signs
- Internal & External Space Availability Signs
- Level Counting
- Parking Information Statistics
- Easy Graphical User Interface

About TCS

TCS International manufactures and designs intelligent parking guidance solutions. Real time monitoring allows our customers to promote open spaces, and improve vehicle flow by reducing "cruising" which increases operator and customer satisfaction. Getting customers to their destination more quickly has the added benefit of reducing your facility's carbon footprint. TCS conceptualizes, manufactures, and continually improves all of its products by harnessing over 100 years of direct industry knowledge found in its product development team. From wireless intelligent parking guidance systems, to automated parking management solutions, TCS provides end-to-end solutions to monitor and facilitate car egress for any facility.
